Course Description

The essential question this course addresses is how human beings express emotion through language. Despite emotion being so central to human experience, philosophers, psychologists and scientists still debate how to define it. The course thus begins at the beginning, with a definition of emotion from the perspective of cognitive neuroscience. We then turn to analysis of the expression of emotion by means of facial expression, bodily expression, and the human voice. In these domains, much is shared in common with non-human animals. Human language itself also plays a role in naming emotions and in the positive and negative connotations that accrue to words in different contexts. We also learn about the ways in which those who are not neurotypical may differ in the expression and processing of emotion through language. Generating emotion is part of the appeal of written and visual media, and we study some of the tools that serve to create it. Finally, we examine the ways in which certain stereotypes, such as gendered experience of and expression of emotion, can affect the reception of the self and professional agendas in the public domain.

The course is interdisciplinary in nature: readings targeting the language of emotion are drawn from cognitive neuroscience, experimental linguistics, general linguistics, sociolinguistics, psychology, sociology, and literary studies, among others. The objectives of the course are to enhance our ability to recognize and respond to emotion across different settings and interlocutors, and to consider how others may react to the emotional identity we construct for ourselves.

Minimum technology requirements

The University of Florida expects students entering an online program to acquire computer hardware and software appropriate to his or her degree program. Most computers are capable of meeting the following general requirements. A student's computer configuration should include:

- Webcam
- Microphone
- Broadband connection to the Internet and related equipment (Cable/DSL modem)
- Microsoft Office Suite installed (provided by the university)

Individual colleges may have additional requirements or recommendations, which students should review prior to the start of their program.

Minimum technical skills

To complete your tasks in this course, you will need a basic understanding of how to operate a computer, and how to use word processing software.

Responsibility Statement:

As this is an online class, you are responsible for observing all posted due dates, and are encouraged to be self-directed and take responsibility for your learning. Extensions will only be granted for health or major other reasons and upon presentations of supporting documentation (see also below).

Use of AI responsibility statement:

Use of AI Tools: This course permits you to use artificial intelligence (AI) tools, such as paraphrasers, summarizers, or solvers, to get guidance on assignments, as long as you do so in an ethical and responsible manner. Essentially, you can think of these tools as ways to help you learn but not to entirely create work for assignments like discussion board posts, essays, presentation slides, and so on. AI is more like your tutor or TA, not a replacement for your independent thinking.

This means that you must:

- Not use AI tools to replace your own thinking or analysis or to avoid engaging with the course content.
- Cite or explain any AI tools you use. Provide the name of the AI tool, the date of access, the URL of the interface, and the specific prompt or query you used to generate the output.
- Be transparent and honest about how you used the AI tool and how it contributed to your assignment. Explain what you learned from the AI tool, how you verified its accuracy and reliability, how you integrated its output with your own work, and how you acknowledged its limitations and biases.

You are accountable for any mistakes or errors made by the AI tool. Always check and edit the output before submitting your work. If you discover any inaccuracies or inconsistencies in the output after submission, notify the instructor immediately and correct them as soon as possible.

Using AI tools in an unethical or irresponsible manner, such as copying or paraphrasing the output without citation or transparency, using the output as your own work without verification or integration, or using the output to misrepresent your knowledge or skills, is considered a form of academic dishonesty and will result in a zero grade for the assignment and possible disciplinary action. If you

have any questions about what constitutes ethical and responsible use of AI tools, please consult with the instructor **before** submitting your work.

2. Writing and Grading Rubrics

The Writing Requirement (WR) ensures students both maintain their fluency in writing and use writing as a tool to facilitate learning. Grades for courses that count towards the writing requirement have two components. To receive Writing Requirement credit, a student must receive a grade of C or higher for the course, and must satisfactorily complete the assignments in the writing component of the course.

1. This course carries **2,000** words in that count towards the UF Writing Requirement.
2. The instructor will evaluate and provide feedback on the student's written work with respect to organization and coherence, analysis, argument and support, links to course materials (as appropriate), style, grammar, punctuation and other mechanics.

IV. Quest Learning Experiences

1. Details of Experiential Learning Component

Quest 1 requires an out-of-classroom learning experience that offers students a different take on ideas discussed in class. Our experiential learning assignment involves the selection of an art object, and an explication of any emotion(s) evoked in viewing it. We have studied emotion expression in physical, facial, and bodily forms. We have also investigated the encoding of emotion in words, the discussion of emotion in talk, and the evocation of emotion in music, literature and film. Here, we investigate emotion expression in another medium (ceramics, photography, painting) through the mechanisms that evoke it (space, line, color, texture, movement).

To select your object, visit the Harn Museum. Select the object you would like to work on. If you are unable to visit the Harn, you are welcome to select from your local art museum or space where art is displayed.

Write an essay of 800-1200 words on the object that you have selected that responds to the following questions:

1. What emotion(s) do you feel when viewing this work? What aspects of the object make you feel this way?
2. What aspects of the artist's work evoke this emotion for you? Refer to colors, shapes, line, composition, space, light, and texture as
3. You may also wish to briefly research the artist, and incorporate any perspectives that are relevant in interpreting the
4. Include the title of the work, the artist, and the date of the work in your
5. Guidance on writing can be obtained through UF's Writing Studio, <http://www.writing.ufl.edu>.

The main elements of your essay, however, should be as follows:

1. Title of your essay
2. Description of the object (object type, medium, artist, date, country)
- ♦ Overview of the emotion(s) the object evokes in you, the viewer.
 1. Support for your interpretation of emotion(s) evoked in the form of analysis of components of the artwork as outlined in the guidelines on "How to view an art object."
 2. Additional perspectives from secondary sources. These can be incorporated into the analysis, as appropriate.
 3. Conclusion

2. Details of Self-Reflection Component

Quest requires some formal reflection where students reckon with what they think, why they think it, and what the implications of their thoughts are. This objective is accomplished in this course in direct fashion with Data posts and reflection posts (5 of each, out of a total of 12 possible posts) that ask students to find an example of the target under focus, such as a vocal burst indicating some emotion, or an example of expression of anger in a work context, and to analyze it in context and reflect on any implications for identity display.

This objective is also accomplished in the Data Analysis Essay, and in the Experiential Learning Essay, in which students must select their own text and object for analysis, provide their own interpretation of any emotions expressed and /or evoked, along with supporting evidence for their analysis.

V. Student Learning Outcomes (SLOs)
