Course objectives

David Nathan writes “language documentation, as a new field operating in a largely digital environment, can aspire to exploit all the capabilities of new technologies.” The aim of this course is to equip students with skills to exploit these technologies. Students will learn about choosing appropriate audio and video recording tools and how to get the best results from the ones they choose. They will also learn to process video and audio recording using EUDICO Linguistic Annotator (ELAN) and FieldWork Language Explorer (FLEx). Students will learn about metadata and preparing tests for archiving. They will learn about choosing from existing (nonlinguistic) stimuli and creating supplementary ones to address their specific research needs, and using computational methods to process data.

Course Material: The materials for the course are class notes, articles in journals, book chapters. Some of the articles are available for download at your course site in CANVAS while others are posted at ARES.

Requirements

Final grading is based on an assignment, a test, and a project. While the 4000-level students will do the project work in pairs, 6000-level students will do it alone. The breakdown is as follows:

Assignment (A-E = 5 pts; F = 10 pts)	35 pts
Group (4000-level) / Individual (6000-level) Project & Presentation	50 pts
Reflection paper	15 pts

Regulation around In-Class Recording:

Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.
