Course Description and Objectives

This course is an introduction to doing formal semantics for linguists, based on the theory of Richard Montague and theories developed within his approach. We will work on the technical "craft", as Heim & Kratzer put it, of doing formal semantics, and in some parallel fashion, on the philosophy that underlies it.

The students will acquire the main ideas and techniques of Type-theory and Lambda-notation, and will be acquainted with more specific topics, as many as time permits.

Pre-requirements:

Students are assumed to already have had a basic introduction to first order logic, set theory, the distinction of semantics vs. pragmatics and (Generative) syntax.

Requirements:

Undergraduates

**Homework* 14%

A total of SEVEN homework assignments must be submitted. Together they will constitute 14% of the final grade (2% each).

Homework is not graded but only given pass/fail check. In order to pass, each assignment must be completed and its lowest grade should be a D, i.e., at least 60% of the assignment should be good. **Homework will not be accepted after due date.**

**Tests*

Two take-home tests 33% x 2 = 66%

The test will be given two days before it is due.

Test one will be given to you on Wednesday, Feb 26 and is due Friday, Feb 28;

Test two will be given to you on Monday, April 21 and is due Wednesday, April 23.

**Reaction Papers* 20%

A total of TEN reaction papers must be submitted. Together they will constitute 20% of the final grade (2% each).

A 'reaction paper' is only required on some of the assignment readings and must be submitted on due time. **I will not grade late papers without a documented excuse.**

The point of a reaction paper is to *react*, i.e. evaluate, criticize, support, or merely raise questions about the assigned readings.

Reaction papers are to be at least one full page in length (but not more than two); typed (font size 12, double space) and printed out neatly. They will not be assigned a letter grade, but only a pass/fail check.

* *Attendance and participation.* Attendance and participation are essential. Each student will be allowed 3 absences without penalty. After that, one point will be deducted from the final grade for every non-excused absence. Showing up later or leaving earlier is considered 1/4 absences.

Graduates

*Homework	10.5%
*Two take-home tests	30% x 2 = 60%
*Reaction Papers	15%
*Term paper	14.5%

A term paper is a conference-style paper, to be presented in class weeks 14, 15. The paper (10+ pages) and oral presentation (10-15 minutes, plus questions) will constitute 14.5% of the final grade (of graduate students). **Topics must be approved by the 13th week.** All papers due by April 21st.
